## PROJECTS

● **Weather App:** It is a React application that shows the current weather conditions of all cities around the world. React Hooks, Rest APIs, and Style Components were used. Skills/Tools: Bootstrap library, Axios library.

● **Restaurant Menu:** The food and beverages in the restaurant were categorized and presented to customers. Styles are given using Bootstrap. It is developed using Javascript, HTML, CSS, Bootstrap.

● **Chat App:** It is real-time messaging application that is developed with React, Node.js, Express.js, Socket.io, Redis. In this project, React Hooks, Module CSS were used.

● **Hotel Site Project:** It is developed in accordance with responsive design. The styles in the project are made with flex layout from the original CSS styles without using any framework. Skills/Tools: HTML, CSS, Responsive Design.
